**SPECIAL TERMS AND CONDITIONS
COLLABORATIVE MESSAGING SOLUTIONS PRIVATE EXCHANGE**

Version dated 16/11/2015

This Agreement is entered into between:

- the HEBERGEMENT OVH INC Corporation, 800-1800 Av. McGill College, Montreal (QC), Canada, a corporation incorporated under the laws of Canada, hereinafter called "OVH,"
- and any person or corporation, individual or professional, private or public, wishing to receive one or more services from OVH, and hereinafter called the "Customer".

ARTICLE 1: PURPOSE

These special terms and conditions supplement OVH's general terms and conditions of service and are intended to set out the technical and financial conditions relating to the Collaborative Messaging Service (the "**Service**") developed by OVH from Microsoft® Exchange. They also determine the contractual provisions applicable to the purchase and use of the Service by the Customer.

These special terms and conditions shall prevail over the general terms and conditions should any conflict arise between these two documents.

The Service offers electronic messaging features allowing the sending and receiving of emails, calendars, file storage space, etc.

ARTICLE 2: MEANS

The Service is accessible via the Internet through an Internet connection. OVH sells a collaborative messaging offer that has been developed on the basis of Microsoft® Exchange. The Service offers not only electronic messaging features but also a collaborative workspace for exchanging files, setting up personal calendars and the like. OVH reminds Customers of the highly technical nature of the Service, and shall use reasonable endeavours to keep downtime of the Service, whether for routine or emergency maintenance or caused by any third party, to a minimum.

ARTICLE 3: DESCRIPTION OF THE SERVICE

The Service is an email solution based on Microsoft Exchange. Its features include the sending and receiving of emails and the sharing of resources or information in a collaborative manner between Accounts created under the same Offer. Shared information may include calendars, events, files or work tasks, for example.

The Service is scalable, multi-accessible and customisable by the Customer in terms of Accounts. An Account is a Collaborative Messaging space created by the Customer and exclusively dedicated to an End User of the Service. Each Account is based on an Exchange Licence and has its own storage space.

ARTICLE 4: SERVICE SUBSCRIPTION AND ACTIVATION TERMS AND CONDITIONS

To subscribe to the Service, the Customer must have the following:

- A domain name for which they are the Administrator. In this regard, the Customer acknowledges that they are authorised to change the configuration of the domain name, DNS servers etc.
- A valid SSL Certificate associated with the domain name that is subject to the Service subscription. An SSL Certificate is a digitally signed electronic data file issued by a certification authority in order to encrypt exchanged data.

OVH does not guarantee the compatibility of the Service with all available domain name extensions. For example, among the extensions sold by OVH to date, the .TEL extension is inconsistent with the Service. OVH recommends that the Customer checks on OVH website for the compatibility of their domain name with the Service.

The Customer must be the Administrator of their domain name before subscribing to the Service. In fact, some domain name configuration operations may be necessary to ensure that the Service is correctly installed.

OVH will create an SSL Certificate for the Customer that they will have to validate via a TXT field. The Customer must enter a TXT field on their domain name which they must confirm in OVH Management Interface, so that OVH can ensure that the Customer is the Administrator of the domain name. OVH is not responsible for delays in the implementation of the Service.

The Management interface is the space accessible on OVH site by the Client after identification by inputting their customer ID and corresponding password.

The Customer is responsible for making sure that they are in compliance with the provisions of this Article before subscribing to the Service. Failing this, the Customer may request termination of the Service in accordance with OVH's general terms and conditions of service.

The Service is activated once payment by the Customer has been confirmed by OVH. At the activation stage, installation of the Service is completed and OVH sends the access codes required for the administration thereof.

ARTICLE 5: SERVICE PERFORMANCE TERMS AND CONDITIONS

Upon confirmation of the Customer's payment by OVH, OVH will install the Customer's Service. It is then up to the Customer to connect to their Management Interface to configure the Service.

The Customer must specify the domain name on which they wish to install the Service, the technical configuration of their domain name and the information relating to its SSL Certificate.

The Customer may create Accounts on the domain names managed at OVH directly in their Management Interface, for which they will be invoiced or debited according to the terms and conditions defined in Article 9 hereof.

The Customer may choose between different Accounts, each of which has a list of available features. OVH reserves the right to add new features to an Account or to change existing features of an Account from time to time.

The Customer is responsible for determining the features that they want to assign to each of their users and for purchasing the corresponding Accounts accordingly. The Customer can acquire different types of Accounts on the Service.

ARTICLE 6: OVH'S OBLIGATIONS

OVH undertakes to take all due care and diligence in providing a quality service in accordance with good industry practice and the state of the art. OVH undertakes to:

- 6.1.** Maintain their technical equipment on which the Customer's Service is installed in working order.
- 6.2.** Ensure access to the Management Interface and to the Service over the Internet. OVH also reserves the right to interrupt the Service to conduct a technical intervention with the objective of improving functionality.
- 6.3.** Respond quickly, on the Customer's request for intervention, to incidents which have not resulted from misuse of the Service by the Customer.
- 6.4.** Maintain their tools at the highest level of quality in accordance with the rules and practice of their profession.
- 6.5.** Ensure Customer Data confidentiality is subject to the proper configuration by the Customer of the access consented to in relation to the Service in accordance with the provisions of Article 8 hereof.

ARTICLE 7: OVH'S RESPONSIBILITY

OVH reserves the right to terminate the Customer's Service if it constitutes a danger to the continued safety of OVH hosting platform, whether due to abnormal, malicious or fraudulent use of the Service. In such a case, OVH will attempt, as far as possible, to inform the Customer first.

OVH cannot be held liable for the information content, sound, text, images, form elements or data of any kind

available on the Customer's Service, or transmitted or posted by the Customer or the Users of their Service in any capacity whatsoever.

OVH cannot be held liable for the total or partial non-compliance with any obligation, and/or failure by network service providers and in particular the Customer's own Internet access providers.

As far as emails are concerned, OVH cannot guarantee the proper delivery of emails sent from the Service by the Customer or any User of the Service, when the message size is greater than the standard size used by email service providers (10 megabytes (MB)).

To ensure the security of the Service or its proper functioning, OVH reserves the right to limit the technical characteristics of access to the Service, including file transfer rates and terms and conditions of access to the platform, or to block any access originating from networks or IP addresses considered by OVH to be unsafe or malicious.

OVH accepts no liability for any malfunction of the Service due to Customer configuration. The Customer is responsible for determining the maximum number of Accounts that can be installed on the Service. For information purposes, OVH recommends that the Customer does not configure more than one thousand (1,000) Accounts on the Service.

OVH reserves the right to suspend the Service if usage does not comply with these special terms and conditions, OVH general terms and conditions of service or the laws and regulations in force, or if its usage infringes the rights of third parties, or when requested to do so by a competent authority. Similarly, OVH may need to access Customer Data at the request of such authorities.

OVH's total liability to the Customer shall be limited as set out in the general terms and conditions.

ARTICLE 8: CUSTOMER'S OBLIGATIONS AND RESPONSIBILITY

8.1. The Customer is acting as an independent entity and therefore it alone assumes all risks of its activity. The Customer alone is responsible for the services, applications and software stored on their Service, for the content of the information transmitted, distributed or collected, for the use and updating thereof and for all files, including address files. The Customer undertakes in particular to respect the rights of third parties, including personality rights and the intellectual property rights of third parties such as copyrights, patent or trademark rights. Accordingly, OVH cannot be held liable for the content of the information transmitted, distributed or collected, for the use and updating thereof and for any files, including address files, in any capacity whatsoever.

OVH may warn the Customer about the legal consequences arising from illegal activities on the Service and OVH shall not be liable in relation to any use of data by the Customer or by third parties to whom the Customer makes data available.

The same principle applies if the Customer is proven to be sending SPAM on the Internet, which will result in the suspension of the Service, without prior notice, and the termination of this contract.

In such circumstances, the Customer will not be entitled to a refund by OVH of sums already paid.

8.2. The Customer shall alone bear the consequences of Service malfunction resulting from any use by members of their staff, their Service users, or any person to whom the Customer has provided one or more password(s) for the purpose of connecting to all or part of the Service. Similarly, the Customer and/or Service users alone bear the consequences of the misuse or loss of the above-mentioned password(s).

8.3. The Customer alone is responsible for the creation, management, administration and deletion of Accounts set up within the Service. In this respect, they are responsible for ensuring the proper management of user access to the Accounts and to any data stored on the collaborative workspace. The Customer is responsible for generating passwords for each Account that they create within the Service.

As such, OVH shall not be liable for intrusion into the Management Interface or into the Accounts that is directly attributable to poor access management on the part of the Customer.

8.4. The Customer is responsible for ensuring that their data is duly backed up before an Account is deleted. When an Account is deleted, all data in that Account will be destroyed by OVH.

8.5. The Customer undertakes to ensure the security of their data and to manage access for each of the Accounts.

8.6 OVH reminds Customers email privacy is protected by the Privacy Act and by the Personal Information Protection and Electronic Documents Act (PIPEDA).

8.7. The Customer guarantees that they are the domain name Administrator for the full duration of the Service.

8.8. The Customer undertakes not to infringe the trademarks of OVH or Microsoft®.

ARTICLE 9: PRICES, PAYMENT AND INVOICING

9.1. Prices

Prices for Collaborative Messaging solutions are available at <http://www.ovh.com> .

9.2. Initial order

Payment of the initial purchase order must be made by credit card or by PAYPAL.

As part of the Service, when the Customer places their initial order, they must rent a private server exclusively assigned to the operation of their Collaborative Messaging Service. This server is rented by the Customer for a one-year period, which is automatically renewable.

9.3. Renewal of the Service

Thereafter, it is the Customer's responsibility to pay for the Service monthly by any means of payment accepted by OVH for the purposes of this contract.

Every month, on the anniversary date of the Service's activation, OVH shall calculate the maximum number of Accounts activated during the previous month and invoice the Customer, for the previous month, the applicable monthly cost per Account type.

For example, if the Customer had 10 standard Accounts at the start of the invoicing period, then activated 5 additional standard Accounts on the twentieth day of their invoicing period, and if this number (10+5=15) equals the maximum number of Accounts activated during the month, OVH would invoice the Customer for 15 standard Accounts at the monthly price applicable to that type of Account at the prices shown on OVH website.

The Customer's contract is automatically renewed for one month from the expiry of the initial subscription period. The payment is made automatically on the Customer's credit card or from its PAYPAL account.

The renewal of the Service only concerns Accounts that are active on the anniversary date of the Service, which are automatically renewed for the following billing period.

The Customer can however request non-renewal of one or more Account(s) within their Service via their Management Interface. The Account(s) selected will not be renewed at the end of the relevant current period once the Customer requests this.

9.4. Options

The Customer will be invoiced individually for every option subscribed within the Service subject to the terms and conditions applicable to the option and set out on OVH website. The option may be invoiced on a one-off basis, monthly or annually depending on the type of option.

9.5. Consequences of late payment

If the Customer fails to pay any amount due under the invoice by the due date specified in the invoice, OVH will send an email to the Customer's address indicated in the Management Interface requesting payment promptly and within no more than 8 calendar days.

If payment has not been received and confirmed by OVH within 8 days of this email being sent, OVH may suspend the Service and all Accounts subscribed within the Service.

The Customer will then have 48 hours to renew the Service. If payment is not confirmed by OVH by the end of this period, OVH will terminate the Customer's Service and destroy all data stored therein.

Any default in payment or inability to collect payments (cancellation of PayPal account, insufficient funds, etc.) will be considered a late payment.

It is expressly agreed that, unless an extension is requested within the applicable time period and granted by OVH expressly and in writing, any full or partial payment default on the due date of any sum due under the contract shall automatically, without prior notice, entail the suspension of all current services of whatever nature, without prejudice to OVH using their right to terminate the contract stipulated in Article 7 of OVH's general terms and conditions of service.

Any disagreement concerning the invoicing and the nature of the Service must be expressed by email and sent to OVH support (customersupport@ovh.co.uk) within 5 days of the renewal invoice.

If any costs are incurred by OVH or by Microsoft®, OVH will inform the Customer of this and send the Customer the supporting documentation and the corresponding invoice. The Customer will be required to reimburse these costs.
